Ebooks

Ebooks supplied to individuals are single-user only and must not be reproduced, copied, stored in a retrieval system, or distributed by any means, electronic, mechanical, photocopying, email, internet or otherwise.

Ebooks supplied to academic libraries, corporations, government organizations, public libraries, and school libraries are subject to the terms and conditions specified by the supplier.

Contents

	Dedication	v
	Preface	vii
1	Type III CRISPR/Cas System: Introduction and its Application for Genetic Manipulations	1
	Tao Liu, Saifu Pan, Yingjun Li, Nan Peng and Qunxin She	
2	dCas9: A Versatile Tool For Epigenome Editing	15
	Daan J.W. Brocken, Mariliis Tark-Dame and Remus T. Dame	
3	Treating Genetic Disorders Using State-of-the-Art Technology	33
	Muhammad Jamal, Arif Ullah, Muhammad Ahsan Naeem, Rohit Tyagi, Zeshan Habib, Faheem Ahmad Khan and Khaista Rehman	
4	An Era of CRISPR/Cas9-mediated Plant Genome Editing	47
	Haris Khurshid, Sohail Ahmad Jan, Zabta Khan Shinwari, Muhammad Jamal and Sabir Hussain Shah	
5	CRISPR/Cas9-mediated Immunity in Plants Against Pathogens	55
	Muhammad Sameeullah, Faheem Ahmed Khan, Göksel Özer, Noreen Aslam, Ekrem Gurel, Mohammad Tahir Waheed and Turan Karadeniz	
6	Improving CRISPR/Cas9 On-target Specificity	65
	Muhammad Jamal, Arif Ullah, Muhammad Ahsan Naeem, Rohit Tyagi, Zeshan Habib and Khaista Rehman	
7	CRISPR-mediated Genome Engineering and its Application in Industry	81
	Saeed Kaboli and Hasan Babazada	
8	Applications of CRISPR/Cas9 in Reproductive Biology	93
	Faheem Ahmed Khan, Nuruliarizki Shinta Pandupuspitasari, Huang ChunJie, Hafiz Ishfaq Ahmad, Kai Wang, Muhammad Jamil Ahmad and ShuJun Zhang	
9	Ethical Issues Regarding CRISPR-mediated Genome Editing	103
	Zabta Khan Shinwari, Faouzia Tanveer and Ali Talha Khalil	
	Index	111

Dedication

This book is dedicated to my family, teachers and friends.

Preface

CRISPR/Cas9 (clustered regularly interspaced short palindromic repeats) and CRISPR-associated gene (Cas) form an adaptive immune response of most archaea and bacteria. Initially discovered in 1987 by a Japanese group, the system was characterized in 2002. In 2012, the *in vitro* cleavage activity of Cas9 was observed followed by its first genome engineering application in eukaryotic cells. To date, more than 4000 papers have been published showing the development and applications of Cas9 for wide areas of biological research. The extensive review of the applications of this system across diverse fields is important to explore further avenues and research directions of this highly potent editing technology. For this book, *The CRISPR/Cas System: Emerging Technology and Application*, we invited several researchers to discuss CRISPR/Cas technology across various genomes, from plants to animals, from reproduction to development, from its role in immunity to genetic diseases, from the

system structure to system specificity and to debate ethical concerns.

This volume is designed keeping in view the urgent need of scientists to get a rigorous review of the applications and new opportunities in using CRISPR/Cas system to progress the field more efficiently. This volume also deals with some of the potential problems with CRISPR/Cas system that need urgent attention. Specificity of CRISPR/Cas system remains the topic of attention for many researchers across the globe as improvement in this can lead to the more direct and efficient use of CRISPR/Cas system in clinical set-up. The speed and efficiency of the CRISPR/Cas system in *ex vivo* applications make it one of best systems for gene therapy. The coming years will unfold many potential uses of the CRISPR/Cas technology, of which this review volume on its applications will prove a seed of thought.

Muhammad Jamal
