Veterinary Vaccines

Current Innovations and Future Trends

Editors:

Laurel J. Gershwin
School of Veterinary Medicine
University of California, Davis
Davis, CA
USA

Amelia R. Woolums
College of Veterinary Medicine
Mississippi State University
Mississippi State, MS
USA
Contents

Chapter 1 .......................................................................................................................... 1
New Approaches to Vaccinology Made Possible by Advances in Next Generation
Sequencing, Bioinformatics and Protein modeling
Amelia R. Woolums and Cypriana Swiderski

Chapter 2 ....................................................................................................................... 31
Cancer Vaccines
Philip J. Bergman

Chapter 3 ....................................................................................................................... 61
Bovine Mucosal Vaccines: Challenges and Opportunities
Paola Elizalde and Philip J. Griebel

Chapter 4 ....................................................................................................................... 107
Adjuvants: State of the Art and New Developments
Sylvia van Drunen Littel-van den Hurk and George Mutwiri

Chapter 5 ....................................................................................................................... 149
Challenges in Having Vaccines Available to Control Transboundary Diseases of
Livestock
Charles E. Lewis and James A. Roth

Chapter 6 ....................................................................................................................... 189
Neonatal Vaccination and Maternal Immunization
Heather L. Wilson and Volker Gerdts

Chapter 7 ....................................................................................................................... 223
RNA Vaccines for Infectious Diseases of Animals: A Future Trend
Laurel J. Gershwin
